Sharon Bernardino

Aspiring Data Analyst | SQL • Python • Tableau

Hornsby NSW 2077 | sharon.bernardino.05@gmail.com | +61 451 173 205

PROFESSIONAL SUMMARY

Detail-oriented Information Technology student (Data Analytics major) with hands-on skills in SQL, Python and Tableau, and a completed Certificate in Data Science & AI from UTS. Experienced in cleaning data, analysing trends and turning results into clear, actionable insights, demonstrated through a customer churn analysis project. Brings 5+ years of experience in healthcare administration and retail team leadership, including working with patient management systems, sensitive data and sales performance reporting. Open to Junior Data Analyst, Reporting Analyst, BI Analyst, graduate and internship opportunities, particularly in healthcare and retail.

TECHNICAL SKILLS

SQL: SELECT, JOINs, GROUP BY / aggregations, subqueries, filtering and sorting data for analysis

Python: pandas, NumPy, data cleaning and wrangling, exploratory data analysis (EDA), Matplotlib / Seaborn

Data Visualisation: Tableau (interactive dashboards, calculated fields, filters), Microsoft Excel (pivot tables, VLOOKUP / XLOOKUP, charts)

Analytical Skills: Data cleaning, KPI tracking, trend analysis, data storytelling, presenting insights to non-technical audiences

Domain Knowledge: Healthcare administration and patient management systems, retail sales and inventory operations

Professional: Stakeholder communication, problem-solving, attention to detail, data privacy and confidentiality

PROJECT EXPERIENCE

Telecom Customer Churn Analysis — **Data Science & AI Certificate, UTS**

- **Objective:** Investigated how contract length affects customer churn and satisfaction for a telecom provider.
- **Approach:** Cleaned and explored customer data, segmented customers by contract type, and compared churn rates and satisfaction scores across segments.
- **Outcome:** Found that customers on longer-term contracts were more satisfied and less likely to churn; recommended contract restructuring with a projected **15% reduction in churn**.

WORK EXPERIENCE

Greater West Medical Centre | Medical Receptionist — **Oct 2022 – Present**

- Manage up to 100 patient interactions daily in a high-traffic clinic, maintaining accurate, complete patient records in medical practice software.
- Used appointment and patient-flow data from practice software to optimise scheduling, reducing wait times by 20%.
- Handle sensitive information in strict compliance with privacy and confidentiality requirements.
- Improved patient satisfaction by 30% through clear communication and proactive problem resolution.

DOPA, Macquarie Park | Team Leader — **Jul 2022 – Jan 2024**

- Monitored stock levels and usage to reduce wastage through more efficient inventory control.
- Ensured financial accuracy through careful oversight of transactions and daily reporting.
- Led daily operations and trained staff during a new restaurant launch, improving workflow efficiency and team productivity.

Boost | Team Leader — **Oct 2020 – Nov 2022**

- Increased weekly sales by 5% by analysing store performance data and identifying upsell opportunities.
- Managed customer service in a high-volume store serving up to 500 customers daily.
- Coordinated shifts, trained staff and solved operational problems to keep the store running smoothly.

EDUCATION

Bachelor of Information Technology (Data Analytics Major) — **In progress**

University of Technology Sydney

Certificate in Data Science & AI — **Completed**

University of Technology Sydney
